Raja Babu Kurra

Computer Science Undergraduate | Backend Engineering & Applied AI

chowdhary.raja0607@gmail.com 6305556437 Hyderabad, India 500070 github.com/enftaurus

linkedin.com/in/raja-babu-968294353

PROFILE

Computer Science undergraduate bridging backend engineering and Artificial Intelligence. Experienced in building scalable, production-ready systems using Go and Python while developing AI applications with LLMs, Agentic AI, multi-agent systems, and semantic search. Strong foundation in Data Structures, Algorithms, and distributed system design.

EDUCATION AND TRAINING

Bachelor of Engineering (B.E.) - Computer Science Engineering 2024 – 2028 | Hyderabad

Vasavi College of Engineering

- CGPA: 9.09/ 10.0
- Runner-Up, GEN AI Forge 2026 Hackathon Conducted by SmartBridge in collaboration with NASSCOM and FutureSkills Prime
- Completed online course on Machine Learning by Andrew NG

SKILLS

Programming Languages
Go, Python, Java, C

Databases & Caching
PostgreSQL, Redis, pgvector, FAISS, Microsoft SQL Server

AI/ML Frameworks & Tools
LangGraph, LangChain, OpenCV, YOLO, XGBoost

Cloud & DevOps
AWS (Bedrock, S3), Azure, Docker, Kubernetes, Git, GitHub

Backend & Web Development
Go (net/http), FastAPI, REST APIs, JWT Authentication

AI & Machine Learning
LLMs, Generative AI, Agentic AI, Multi-Agent Systems, Machine Learning, Semantic Search

Core Computer Science
Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networking

Professional Experience

Software Engineering Intern, *Excellerate Global Pvt Ltd* 05/2026 – 07/2026

- **Built** an AI-powered Applicant Tracking System (ATS) that parsed resumes and job descriptions into structured data using LLM-based information extraction pipelines.
- **Implemented** semantic search and candidate ranking using AWS Bedrock, Cohere Embeddings, vector similarity search, skill clustering, and dynamic weighting to improve recruiter search relevance and matching accuracy by **40%**.
- **Developed** production-ready backend services, REST APIs, and database optimizations with FastAPI and PostgreSQL to support scalable document processing and end-to-end recruitment workflows.

PROJECTS

intrvyuuu - AI-Powered Mock Interview & Career Platform | Github

- **Engineered** a multi-agent interview platform using LangGraph and LangChain to simulate 4 interview types (Coding, Technical, HR, and Managerial) with shared conversational state across interview rounds.
- **Orchestrated** specialized AI agents for interview evaluation, resume analysis, automated job aggregation, and AI-powered career guidance.
- **Integrated** audio response evaluation and MediaPipe + OpenCV-based proctoring to deliver an end-to-end interview experience.

ZeroNet - Google Drive Migration Platform

- **GitHub** || **Live Demo**
- **Engineered** a server-side Google Drive migration platform enabling direct file transfers between Google accounts without consuming client bandwidth or requiring local downloads.
- **Implemented** secure Google OAuth 2.0 authentication, Google Drive API integration, and scalable backend services for seamless account linking and file migration.
- **Designed** asynchronous migration workflows supporting recursive transfer of nested folder hierarchies while preserving directory structure, leveraging server-side execution to significantly reduce migration latency by eliminating client-side data movement.
